## MARICOPA COUNTY INFLUENZA SUMMARY and RSV UPDATE WEEK 49 (12/5/10-12/11/10)

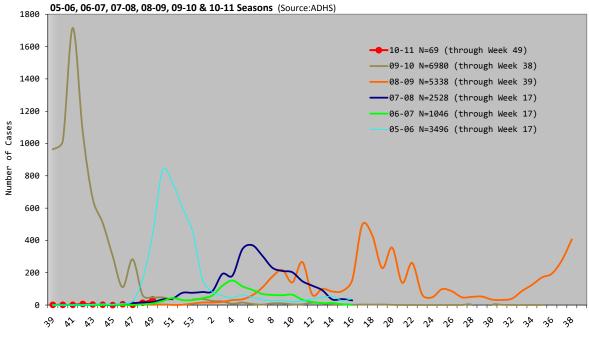

Data contained in this report reflect the time period above except where noted.

- Current Key Findings: Maricopa County experienced increasing flu activity in the past week. Maricopa has a total of 69 confirmed cases of Influenza. Of these, 74% are Influenza A, 19% B and 7% are of an unknown type. The following subtypes have been reported: A/Unknown (25, 36%), A/H3 (24, 35%), 2009 A/H1N1 (2, 3%), B (13, 19%), and Unknown (5, 7%).
- Lab Confirmed Influenza: Between Weeks 48 and 49 of 2010, 35 cases of Influenza have been confirmed at laboratories.
- Pneumonia & Influenza Mortality: No data available this week.
- Pediatric Deaths Associated with Laboratory-Confirmed Influenza: No deaths have occurred in the 2010-11 season.
- Influenza-Like Illness (ILI) (Through week 49)
  - Cigna Health Centers (n=20): 0.06% of visits were due to ILI (provisional data; subject to change as updated information becomes available).
  - Hospital Emergency Departments (n=13): 3.02% of visits were due to ILI. Last week the percentage of hospital emergency department visits due to ILI was 2.58%.
  - Arizona State University Student Health Services: 0.73% of visits were due to ILI. Last week 0.65% of visits were due to ILI.
- Selected Emergency Department (ED) Visits: (n=8)
  - Less than 1% of all visits were due to ILI. (As of 12/17/2010)
  - 15.26% of all visits were due to a respiratory syndrome. (As of 12/17/2010)
- School Syndromic Surveillance (criteria: ≥3 days/week of reporting and 50% known absenteeism): 0.39% of students were absent from school due to an Influenza-like-illness during week 50. (As of 12/17/2010)
- **Respiratory Syncytial Virus (RSV):** Eleven new cases of RSV have been reported during week 49. Last week, 11 cases were also reported.

<sup>\*</sup>Sample sizes shown in chart legend represent confirmed influenza cases for the 2010-2011 season only. (Starting week 39)

### Influenza-Like Illness (ILI)\* Surveillance

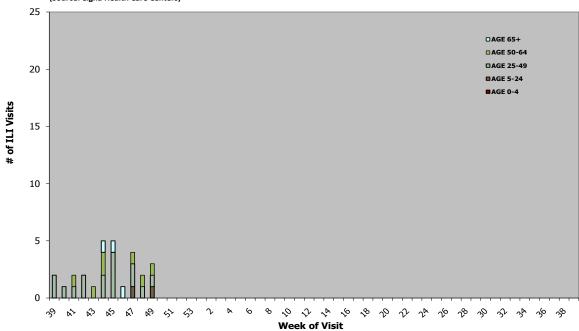

### \*ILI case definition: fever (at least 100°F) AND cough and/or sore throat.

- During Week 49, 0.06% of patient visits to Cigna Health Care Centers (data from 20 centers, six departments) were due to ILI. During Week 49 of the two previous seasons, 0.17% (09-10) and 0.03% (08-09) of patient visits to Cigna Health Care Centers were due to ILI. (\*Provisional data; may change in subsequent reports as updated information becomes available.)
- The percentage of Emergency Department visits for ILI was 3.02% for Week 49. During Week 49 of the two previous seasons, 1.64% (09-10) and 1.55% (08-09) of patient visits were due to ILI.
- Arizona State University Student Health Services had 0.73% of visits due to ILI during Week 49.

Maricopa County 2010-2011: School ILI Surveillance by MMWR WeeK (N=44 Schools)

#### Glossary:

2010-2011 Influenza Season is September 26, 2010 through October 1, 2011. In terms of the surveillance weeks recognized by the Centers for Disease Control, the 2010-11 Season is Week 39 2010 through Week 39 2011.

**Activity Levels**: Indicator of the geographic spread of influenza activity, reported to CDC by all states each week.

**Widespread**: Increased influenza-like illness from sentinel providers (ILI) in three or more regions and large numbers of laboratory-confirmed influenza cases in those regions.

**Regional**: Increased ILI in two regions and elevated numbers of laboratory-confirmed influenza cases in those regions.

**Local**: Increased ILI in one region and elevated numbers of laboratory-confirmed influenza cases in that region.

Sporadic: No increase in ILI activity and only isolated laboratory-confirmed influenza cases.

**No Activity**: No increase in ILI activity and no laboratory-confirmed influenza cases.

#### Influenza Activity outside Maricopa County

Information on influenza activity outside Maricopa County is available at these sites:

- http://azdhs.gov/phs/oids/epi/flu/az flu surv.htm (Arizona Department of Health Services)
- http://www.cdc.gov/flu/weekly/fluactivity.htm (CDC)

Due to wide variability between national- and local-level data, it is not appropriate to apply any national baselines or thresholds to the information presented in this report.

Please email any questions about this report to: <u>vjollcaberisha@mail.maricopa.gov</u> Report generated: 12/17/2010

### Influenza Surveillance Participants include:

Arizona Department of Health Services

Cigna Health Care Centers

Arizona State University Campus Health Services

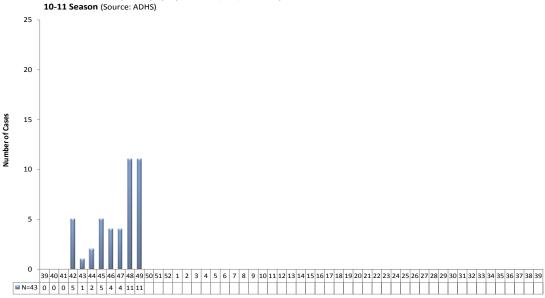

Local Hospital Emergency Departments & Infection Control Practitioners

72 Maricopa County Public Schools

## MARICOPA COUNTY RSV SUMMARY UPDATE WEEK 49 (12/5/10-12/11/10)

**Respiratory Syncytial Virus (RSV) Lab Surveillance:** At the time of this report, 43 lab-confirmed cases of RSV have been reported through Week 49.
